Session-3

Task-1 : Create an HTML form for a Flipkart-style product review, including input fields for username, rating (as a dropdown from 1 to 5), and a textarea for the review message. Use appropriate labels for each field.

Session-3.html Session-3.html\html\body\form\input#username

```html
<!doctype html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Session-3</title>
  </head>
  <body>
    <form>
      <h1>Rate &amp;amp; Review this Product</h1>

      <label for="username">Username</label>
      <input
        type="text"
        id="username"
        name="username"
        placeholder="Enter your name"
      />

      <label for="rating">Rating</label>
      <select id="rating" name="rating">
        <option value="">-- Select rating --</option>
        <option value="1">1 - Poor</option>
        <option value="2">2 - Fair</option>
        <option value="3">3 - Good</option>
        <option value="4">4 - Very Good</option>
        <option value="5">5 - Excellent</option>
      </select>

      <label for="message">Review</label>
      <textarea
        id="message"
        name="message"
        placeholder="Write your product review"
      ></textarea>

      <button type="submit">Submit Review</button>
    </form>
  </body>
</html>
```

**Task-2 : Add HTML5 validation attributes to your review form so that username is required, rating must be selected, and the review message must be at least 20 characters long.

Hint: Use required, minlength, and a default unselectable option for the dropdown.**

Session-3.html Session-3.html\ html\ body\ form\ textarea#message

```html
<!doctype html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Session-3</title>
  </head>
  <body>
    <form>
      <h1>Rate &amp;amp; Review this Product</h1>
      <label for="username">Username</label>
      <input
        type="text"
        id="username"
        name="username"
        placeholder="Enter your name"
        required
      />

      <label for="rating">Rating</label>
      <select id="rating" name="rating" required>
        <option value="" selected disabled>-- Select rating --</option>
        <option value="1">1 - Poor</option>
        <option value="2">2 - Fair</option>
        <option value="3">3 - Good</option>
        <option value="4">4 - Very Good</option>
        <option value="5">5 - Excellent</option>
      </select>

      <label for="message">Review</label>
      <textarea
        id="message"
        name="message"
        placeholder="Write your product review (minimum 20 characters)"
        minlength="20"
        required
      ></textarea>

      <button type="submit">Submit Review</button>
    </form>
  </body>
</html>
```

**Task-3 : Modify your form to use the POST method and, after submitting a test review, open the DevTools Network tab to preview the POST request data sent by your form.

Hint: Look for the form submission request and expand the payload/details to see your input values.**

Session-3.html Session-3.html\ html\ body\ form\ select#rating\ option

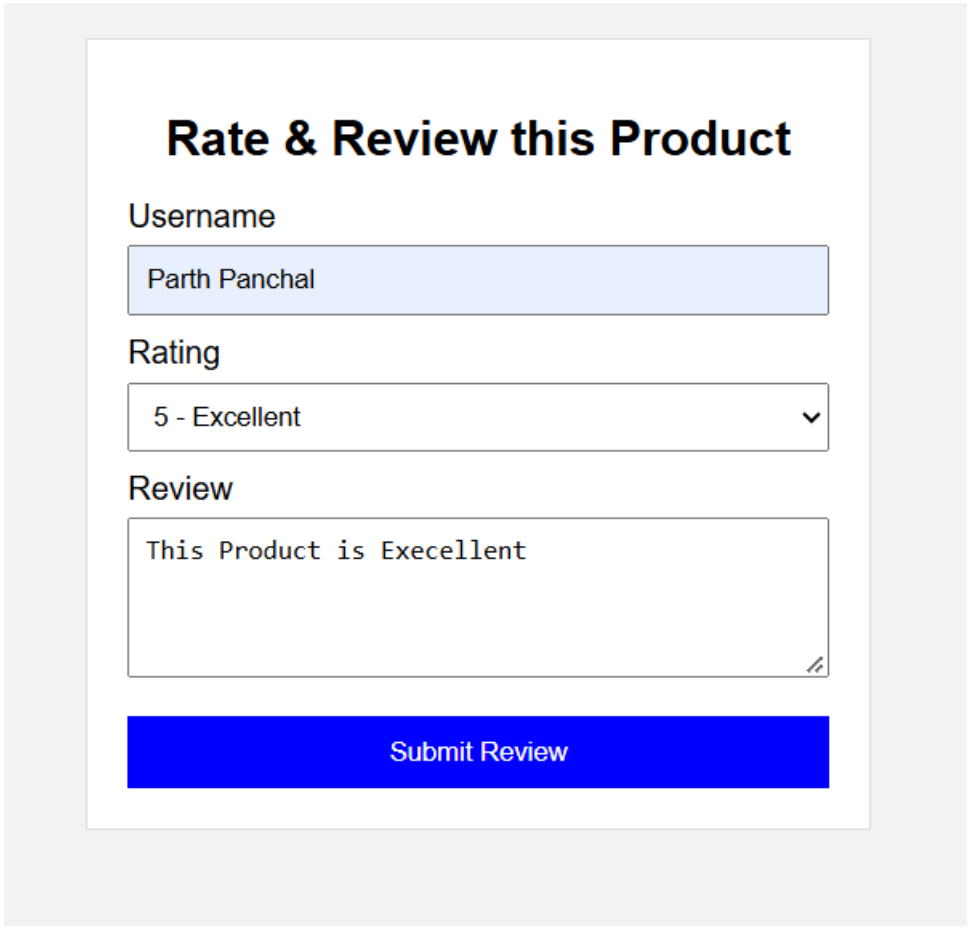

```html
<!doctype html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Session-3</title>
  </head>
  <body>
    <form action="" method="post">
      <h1>Rate &amp;amp; Review this Product</h1>

      <label for="username">Username</label>
      <input
        type="text"
        id="username"
        name="username"
        placeholder="Enter your name"
        required
      />

      <label for="rating">Rating</label>
      <select id="rating" name="rating" required>
        <option value="" selected disabled>-- Select rating --</option>
        <option value="1">1 - Poor</option>
        <option value="2">2 - Fair</option>
        <option value="3">3 - Good</option>
        <option value="4">4 - Very Good</option>
        <option value="5">5 - Excellent</option>
      </select>

      <label for="message">Review</label>
      <textarea
        id="message"
        name="message"
        placeholder="Write your product review"
        minlength="20"
        required
      ></textarea>

      <button type="submit">Submit Review</button>
    </form>
  </body>
</html>
```

The Network tab displays the following submitted data

Task-4: Build a Zomato-style food order form with inputs for user name, a select dropdown for food item (at least 3 options), quantity (number input), and a textarea for delivery instructions. Ensure all fields are labeled and use required validation.

Task-5: Add a disabled input field to your food order form that displays a fixed order ID (e.g., ORD12345) and explain in a comment why this field should be disabled for users.
